

April 27th - Weekly Update

Front-End Team [Prasanna and Kavya]

- Move from one image to next image, only that image corresponding polygons to be displayed in right panel.
- Edit of group id of annotated object to be added in setup.
- Delete of the individual annotated component.
- Save as json to be added to tool.
- Zoom and unzoom added.
- Point to mask and mask to point facility to be added to tool
- The slider to increase/decrease the points is also added. The points can't be decreased more than the original points.
- The custom made polygon name is added to the dropdown list automatically.

Next Steps

- Once someone restarts the tool, the tool will load the json if it is already annotated and display that output.

Back-End Team [Aravinthakshan and Janak]

- Partial Integration of Backend and Frontend done.
- Ritm github repo setup done.
